

Viscolas® is the only visco-elastic polymer formulated for orthopedic application. Viscolas® can reduce symptoms of heel strike injuries such as tendonitis and shin splints. Non-irritating Viscolas® is resistant to fungal and bacterial growth and can easily be cleaned with soap and water. And the natural tackiness of components can be increased with an application of alcohol or decreased with a dusting of talcum powder. All Viscolas® products are Hypoallergenic, safe for direct skin contact and documented by independent Clinical tests.

ORTHEX™ RELIEVER® Insoles

Made of a soft viscoelastic polymer that won't "bottom out" under the weight of your body or with lots of wear, these insoles will cushion the shock that is created at heel strike. Reducing the shock will help to reduce the foot, leg, and back pain experienced during the day. A special surface tackiness adhesive keeps these foot pain relief insoles in place to prevent bunching at the toe area. Moisture wicking fabric cover.

ULTRA PERFORMER™ Insoles

Closed cell high-profile footbeds offer a lighter-weight alternative to solid viscoelastics. They are more contoured and offer more heel stabilization and extra arch support. Recommended in harsh environments where frequent insole replacement is necessary. With Viscolas® inserts to dampen shock in the areas where heel strike causes the most underfoot pressure.

ORTHEX™ HEEL Cushions

Provide effective protection against the harmful effects of heel strike and are designed to fit any shoe, including women's pumps and all tighter-fitting dress shoes. They are particularly useful in situations where the fit of the shoe won't allow the use of a full insole as well as treatment of conditions such as Achilles tendonitis.

ORTHEX™ HEEL SPUR Relief Cushions

Provide maximum shock protection and pressure reduction for patients suffering from calcaneal heel spurs or other acutely painful heel conditions. A removable plug allows for a cavity to be created beneath the area of greatest discomfort, while extra cushioning on the medial side of the plantar fascia provides added relief.

BLUE DOT™ Heel Spur Cushions

Medical-grade silicone cushion with "Blue Dot" area with softer silicone to help cushion the heel for greater comfort underfoot. The cupped design forces the fatty pad of the heel (the body's own natural defense against skeletal shock) downward for extra protection. Ideal for the vigorous athlete or for anyone whose normal routine requires distance walking. Cups the heel area to enhance natural shock defense system.

BLACK MAXX™ Vibration Damping Gloves

These economical nylon/cotton knitted vibration damping gloves are coated with "pods" of lightweight cellular Chloroprene. The combination makes for extremely comfortable vibration reducing gloves that use encapsulated air to cushion and dampen vibration, giving the user good dexterity, a lightweight feel, and reduced bunching. The vibration reducing gloves absorb and dissipate some of the vibration emitted from pneumatic and impact tools, helping to reduce fatigue to hands, arms, and shoulders.

FLEXIGRIP™ Hand Exerciser

Developed under the direction of a hand rehabilitation specialist, designed to allow anyone to perform a wide assortment of movements for reeducating muscles. FLEXIGRIP isometrically builds grip, isolates thumb or finger flexion and exercises pinch motion - all of which improve range of motion. Ideal for the athlete who wants to improve grip strength. Available in two densities. Recommended by hand specialists for years.

#4823	Soft
#4824	Firm

Physicians Orthotics - Custom Components

Viscolas® Modular Orthotic System are specialized custom orthotic components that are ideal for use in conjunction with Reliever insoles to alleviate certain painful foot conditions. Available in a variety of sizes, self-adhesive so they stay in place where you put them. Wide range of components allow flexibility to formulate immediate custom orthotic for patients requiring moderate adjustments. Combinations for therapeutic and preventive treatment.

ORTHEX™ Tool Handle Grip Wrap Kits

Viscolas® is applied directly to the tool providing a softer, more yielding handle surface. This design gives full flexibility of hand movement while providing a layer of vibration-reducing elastomer to enhance the body's own natural energy absorbing system. 2½" for large tools, 1¾" for small tools, an alternative wrap for closed-ended handle tools.

Kit has enough materials to wrap 3 tools.

ITEM	DIMENSIONS	SHRINK TUBE

#4717	12"x5"x3/16"	1¾"x18"
#4718	12"x5"x1/8"	1¾"x18"

GRIP MASTER™ Tool Handle Grip Wrap

Vibration dampening tool wrap has an extra layer of super soft, non-slip padding to help reduce an even greater vibration frequency range. Application is easier too. A new "band-aid" type closure allows application in two simple steps without the use of shrink tubing or additional wrap tape. One size fits all. One kit per tool. #4720

Sheeting

Viscolas® sheets are available in a variety of sizes and thicknesses. Can be cut with scissors to form custom orthotic components or cut into strips for bumpers or padding. Can also be die-cut for insulation units, gasket materials, etc.
