

IMPACTO® BACK PROTECTION

LUMBOSACRAL AIR BELT®

Supports and Stabilizes the LUMBAR and SACRAL region

- > Patented air pneumatic technology. Inflatable multi-celled chambers conform to your back when air is added providing support to the LUMBAR and SACRAL region
- > It naturally massages the back muscles reducing pain and discomfort
- > Extended air bladder design hugs the contours of the hip to prevent riding up, ideal for women use
- > Naturally supports the lower back helping to alleviate pain and discomfort
- > Durable, easy to clean nylon outer cover with moisture wicking inner lining
- > Nylon outer shell with soft neoprene front panels and adjustable hook and loop closure
- > Open cell foam lining offers comfort and warmth
- > Aspirator and air pressure valve are incorporated to the belt for easy hand pumping and deflating
- > Upper strap offers firm hold and extra abdominal support while the sturdy nylon Lower straps provide additional compression

> Variations:

DIPBELT – shorter bladder, without extra straps

| Part No. | Size | Waist |
|----------|------|--------------------------|
| LSS | S | 24" - 28" / 61-82 cm |
| LSM | M | 29" - 35" / 82-94 cm |
| LSL | L | 36" - 41" / 104-107 cm |
| LSXL | XL | 42" - 46" / 104-122 cm |
| LSXXL | XXL | 47" - 42" / 119 - 132 cm |
| LSXXXL | XXXL | 53" - 58" / 137 - 147 cm |

SIZING: Use your hip measurement, add 2" if belt is to be worn over clothing.

WASHING: Hand wash in cold water and soft detergent. Do not bleach, do not dry by machine, do not dry clean.

ABOUT THE PATENTED AIR BELT TECHNOLOGY

The Air Belt is a uniquely designed inflatable Lumbar Support that can be conveniently worn inside or outside of clothing without restricting normal mobility. Features the Patented Air Bladder System. When inflated the interconnected air chambers conform to the back applying forward pressure that supports and naturally massages to reduce muscular discomfort. The Air Belt helps to encourage proper alignment of the lower back, a key for a healthy back.

IMPACTO's patented multi-cell pneumatic Air Bladder Technology employs air as the primary element to not only effectively support but to cushion and stabilize as well. The unique design provides optimum anatomical conformance with firm supportive pressure to specific muscles. There is no restriction of blood flow or inhibition of natural range of motion. In addition, the air cells actually create a pulsing, graduated compression which massages the muscles, keeping them properly elongated and in a resting state. In this condition muscles are less prone to initial or continuous injury.
