

# IMPACTO® FOOT PROTECTION

## Anti-Fatigue Viscolas® Ultra Performer Insoles

Closed cell high-profile footbeds offer a lighter-weight alternative to solid viscoelastics. They are more contoured and offer more heel stabilization and extra arch support. With Viscolas inserts in the heel and metatarsal area to dampen shock in the areas where heel strike causes the most underfoot pressure.

- > **Help reduce symptoms of heel strike injuries such as tendonitis and shin splints**
- > **Non-irritating, resistant to fungal and bacterial growth**
- > **Great in harsh environments where frequent insole replacement is necessary**
- > **Reducing the shock will help to reduce the foot, leg, and back pain**
- > **Used with sports shoes or work shoes and boots**
- > **Made in USA, USDA accepted**
- > **Variations:**  
**Viscolas Relievers - full flat style**

**FITTING INSTRUCTIONS** If your shoe size does not correspond exactly to the size range indicated, you may trim the front part of the insole with a pair of scissors. **DO NOT TRIM THE HEEL AREA.** Before inserting the insole remove any existing insoles from the shoe.

**CARE INSTRUCTIONS** Hand wash or wipe the surface with rubbing alcohol or warm soapy water. Hang to Dry.

**IMPORTANT** It is recommended that once inserted the insoles remain in the shoes. Continual removal of insoles from one pair of shoes to another may cause deterioration.
