Utilizing Visco-Elastic Polymer (VEP) Padding
Protects the Palm from Impact and Shock

› The back is made with nylon fabric to ensure optimum breathability and comfort
› Palm made of soft pearl leather for dexterity and abrasion protection
› VEP 1/8” padding in the palm protects from impact and shock
› Half finger style leaves fingers open for tactile feedback and mobility
› Hook and loop wrist closure
› Great for protection from electric, manual and power tools in applications including driving, sports, wheelchairs and manufacturing
› Variations:
  403-30 – full finger style
  471-30 – with leather wrist support

In Conformance with Norms:
EN 388:2003
Protective gloves against mechanical risks
General requirements for gloves

Sizing: Measure the circumference of the hand at the base of fingers.
Washing: Hand wash in cold water and soft detergent.
Do not bleach, do not dry by machine, do not dry clean.

IMPACTO anti-impact gloves utilize Visco-Elastic Polymer (VEP) padding. VEP has excellent impact absorbing and shock dissipation qualities as well as absorption of higher levels of vibration. VEP is made from polyurethane with additional chemicals that increase its viscosity level. It is effective in redistributing and reducing local pressure on the area padded. VEP will not “compression set”, making it extremely durable to stand to rigorous repetitive tasks. IMPACTO offers a large line of VEP padded gloves to suit customized needs.
