

IMPACTO® ANTI-IMPACT GLOVE

Utilizing Visco-Elastic Polymer (VEP) Padding Protects the palm from Impact, Vibration and Shock

- › Made of 4-way stretch polycotton fabric to ensure optimum breathability and comfort
- › Contoured VEP 1/8" padding in the palm extended to the wrist joint to offer additional protection
- › Fingerless style leaves fingers open for tactile feedback and mobility
- › Designed to be worn under work glove
- › Great for protection from electric, manual and power tools in applications including construction, assembly, manufacturing, maintenance and warehousing
- › Variations:
501-00 - liner pad not extended
501-35 - with pearl leather cover

Model **510-00**

IMPACTO anti-impact gloves utilize Visco-Elastic Polymer (VEP) padding. VEP has excellent impact absorbing and shock dissipation qualities as well as absorption of higher levels of vibration. VEP is made from polyurethane with additional chemicals that increase its viscosity level. It is effective in redistributing and reducing local pressure on the area padded. VEP will not "compression set", making it extremely durable to stand to rigorous repetitive tasks. IMPACTO offers a large line of VEP padded gloves to suit customized needs.
