

IMPACTO® ANTI-IMPACT GLOVE

Protects the back of the hand from Impact

Used in food and mining industries to protect from impact

Model **606-00**

- › Made of 4-way stretch polycotton fabric to ensure optimum breathability and comfort
- › Neoprene padding in the back of the hand from tip of finger over to the wrist
- › Full finger style offers optimum protection
- › Designed to be worn under work glove
- › Used to protect the back of the hand from impact and cumulative trauma in jobs such as coal mining and in food industry live hangers and poultry applications

› Variations:

601-00 - with VEP pad in palm and fingers

IMPACTO anti-impact gloves utilize Visco-Elastic Polymer (VEP) padding. VEP has excellent impact absorbing and shock dissipation qualities as well as absorption of higher levels of vibration. VEP is made from polyurethane with additional chemicals that increase its viscosity level. It is effective in redistributing and reducing local pressure on the area padded. VEP will not "compression set", making it extremely durable to stand to rigorous repetitive tasks. IMPACTO offers a large line of VEP padded gloves to suit customized needs.

In Conformance with Norms:

EN 388:2003

Protective gloves against mechanical risks

EN 420:2003+A1:2009

General requirements for gloves

Sizing: Measure the circumference of the hand at the base of fingers.

Washing: Hand wash in cold water and soft detergent. Do not bleach, do not dry by machine, do not dry clean.

TRUSTED PROTECTION

Glove	Hand	Circumference
