## Utilizing Visco-Elastic Polymer (VEP) Padding Protects the palm, fingers & thumb web from Impact and Shock

- > Made of 4-way stretch polycotton fabric to ensure optimum breathability and comfort
- > Contoured VEP 1/8" padding in the palm and fingers protect from impact and shock
- > Full finger style offers optimum protection
- > Designed to be worn under work glove
- Great for protection from electric, manual and power tools in applications including construction, assembly, manufacturing, maintenance and warehousing
- > Variations:

502-00 - fingerless style

601-00 - without pad in the thumb web area

712-02 - with grain leather wrist support

Model 611-00

IMPACTO anti-impact gloves utilize Visco-Elastic Polymer (VEP) padding. VEP has excellent impact absorbing and shock dissipation qualities as well as absorption of higher levels of vibration. VEP is made from polyurethane with additional chemicals that increase its viscosity level. It is effective in redistributing and reducing local pressure on the area padded. VEP will not "compression" set", making it extremely durable to stand to rigorous repetitive tasks. IMPACTO offers a large line of VEP padded gloves to suit customized needs.
