- > Made of nylon Lycra to ensure breathability and comfort
- > Suede leather cover on the palm
- > Contoured VEP 1/8" padding in the palm extended to the entire wrist support
- > Suede leather wrist support prevents over flexion and over extension to help prevent RSI
- > Adjustable hook and loop closure
- > For protection from hand tools and power tools in applications including construction, assembly, manufacturing and maintenance

Model **700-10**

IMPACTO anti-impact gloves utilize Visco-Elastic Polymer (VEP) padding. VEP has excellent impact absorbing and shock dissipation qualities as well as absorption of higher levels of vibration. VEP is made from polyurethane with additional chemicals that increase its viscosity level. It is effective in redistributing and reducing local pressure on the area padded. VEP will not "compression set", making it extremely durable to stand to rigorous repetitive tasks. IMPACTO offers a large line of VEP padded gloves to suit customized needs.
