

IMPACTO® AIRELBOW

TENNIS ELBOW SUPPORT WITH PATENTED AIR BLADDER
Helps alleviate and prevent pain caused by lateral epicondylitis
Provides support and helps prevent injuries

- › The AIRELBOW is designed to support the upper forearm during activities involving repeated hand motion, specially those requiring a strong grip, torquing of the arm, and those where impact occurs with a tennis racket, golf club, working with vibrating and impact tools
- › Provides relief and prevention of pain related to muscle strain, tendinitis, repetitive motion, carpal tunnel syndrome, medial and lateral epicondylitis
- › The AIRELBOW applies compression to the extensor muscles of forearm
- › Inflatable air chambers provide concentrated compression to a large area of the elbow
- › Provides excellent conformation to the arm dampening vibration and shock transmitted to the lateral tendon
- › Helps to reduce tendon inflammation where muscle and tendon connect to elbow
- › Use for sports like golf or tennis, during gardening or while using impact and vibrating tools

ABOUT TENNIS/GOLFER'S ELBOW

Golfer's elbow, or medial epicondylitis, is similar to its counterpart Tennis Elbow or lateral epicondylitis. The primary differences between these conditions are the location of the pain and the activity that leads to injury. However, both conditions are a form of tendonitis caused by overuse of the muscles and tendons of the forearm, leading to inflammation and pain around the elbow joint.

Causes

The mechanism of these injuries can vary from a single violent action to, more commonly, repetitive strain injury where an action is performed repeatedly and pain gradually develops. No one is immune from these injuries, but they are aggravated when activity is increased in intensity or duration. Golf and tennis are common causes of these symptoms, but many other sport- and work-related activities can cause the same problem.

Note The AIRELBOW is a support product only and should not be considered a remedy for any conditions. Consult your physician for treatment and advise on any medical conditions.

INSTRUCTIONS To inflate Air chamber, cover hole and squeeze and release until firm with your index and thumb. Place around largest part of lower arm over the affected area. Trim band for perfect fit. Wrap strap over plastic ring, pull over top and secure. Hand wash in lukewarm water and mild detergent. Scrub with soft brush if needed, air dry. Do not machine wash or place in dryer, do not dryclean.

MODEL AIRELBOW

Includes inflatable air bladder (3" wide x 8" long). Soft foam padded shell with pocket to insert air bladder. Strap is adjustable with hook and loop closure. Universal size.
