The IMPACTO Air Glove reduces vibration energy transmission to the palm and fingers. Non-permeable polymer bladder with multiple individual air chambers provides effectiveness that won't degenerate. Soft, flexible bladder is designed to conform to the flex-lines of the palm and fingers helping to maintain tool control. The multiple air chambers construction of the Air Bladder ensures long lasting wear that won't bottom out. The Air Bladder helps prevent job specific impact and vibration hazards in the workplace. Full finger Air Gloves are in conformance with International Anti-Vibration Glove Standard EN ISO 10819 Mechanical Vibration and Shock-Hand-Arm Vibration and North American Standard ANSI S2.73-2002 (R 2007) / ISO 10819.
