“Ergotech” Glove Protects the palm from Impact and Shock
Wrist support protects from Repetitive Strain Injuries (RSI)

- › Made of nylon fabric to ensure optimum breathability and comfort
- › VEP 1/8” dimple padding protects the palm and thumb web area from impact
- › Half finger style leaves fingers open for tactile feedback and mobility
- › Black suede leather cover on the palm
- › Detachable padded elastic wrist support with hook and loop closure prevents over flexion and over extension of the wrist to prevent RSI
- › Great for protection from electric, manual and power tools in applications including construction, assembly, manufacturing, maintenance and warehousing

Model **ER509**

IMPACTO anti-impact gloves utilize Visco-Elastic Polymer (VEP) padding. VEP has excellent impact absorbing and shock dissipation qualities as well as absorption of higher levels of vibration. VEP is made from polyurethane with additional chemicals that increase its viscosity level. It is effective in redistributing and reducing local pressure on the area padded. VEP will not “compression set”, making it extremely durable to stand to rigorous repetitive tasks. IMPACTO offers a large line of VEP padded gloves to suit customized needs.
