

IMPACTO® ANTI-IMPACT GLOVE

Utilizing Visco-Elastic Polymer (VEP) Padding “Ergotech” Glove Protects from Impact and Shock

- › Made of nylon lycra spandex fabric blend ensures optimum breathability and comfort
- › VEP 1/8” dimple padding protects the palm, thumb, fingers and thumb web area
- › Full finger style ensures maximum protection
- › Designed to be worn under work glove
- › Great for protection from electric, manual and power tools in applications including construction, assembly, manufacturing, maintenance and warehousing
- › Variations:
ER605CP – in polycotton without thumb web pad
ER501 – half finger style
ER502 – half finger with black suede leather

Model ER605N

Model ER605CP

IMPACTO anti-impact gloves utilize Visco-Elastic Polymer (VEP) padding. VEP has excellent impact absorbing and shock dissipation qualities as well as absorption of higher levels of vibration. VEP is made from polyurethane with additional chemicals that increase its viscosity level. It is effective in redistributing and reducing local pressure on the area padded. VEP will not “compression set”, making it extremely durable to stand to rigorous repetitive tasks. IMPACTO offers a large line of VEP padded gloves to suit customized needs.

In Conformance with Norms:

EN 388:2003

Protective gloves against mechanical risks

EN 420:2003+A1:2009

General requirements for gloves

Sizing: Measure the circumference of the hand at the base of fingers.
